Skills

Languages: Java, Python, JavaScript, TypeScript, SQL

Frameworks: ReactJS, FastAPI, Django, LangChain, LangGraph

Technologies & Tools: Git, GitHub, Docker

Work Experience

WETEC Systems GmbH (Remote)

Jan 2026 - Present

Python Backend Developer

- Analyzed the architecture of **pypasoom**, a Python-based energy system simulation framework built around Modelica/OpenModelica workflows.
- Explored approaches for decoupling the Modelica compilation pipeline by designing the initial structure for a standalone **om-compiler** service.
- Set up a containerized development environment using **Docker**, OpenModelica, and **pixi** for reproducible builds and dependency management.

Education

Indian Institute of Information Technology Vadodara, Gandhinagar

Aug 2023 - Nov 2027

BTech in Computer Science and Engineering

CGPA: 8.39/10

Relevant Coursework: Object Oriented Programming, Database Management Systems, Discrete Mathematics, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Linear Algebra, Design and Analysis of Algorithms, System Software, Distributed & Parallel Computing

Project Work

- **Lumin – AI Chat Application:** Built a full-stack persistent memory based LLM chat system for conversational queries and web searches. Developed a React-based interface for state management and user interaction and enabled users to store useful AI responses as blog entries for later reference. [GitHub](#)
- **WebQuery RAG Chatbot:** Developed a browser extension for quick documentation lookup using Retrieval-Augmented Generation. Scraped hierarchical web documentation using BeautifulSoup and enriched content with metadata and source links. Designed backend retrieval pipeline using FastAPI and LangChain. [GitHub](#)
- **Course Registration System:** Developed a full-stack course registration portal simulating a university academic workflow. Implemented role-based authentication and session management using Django and integrated automated email notifications for course enrollment updates. [GitHub Live](#)

Achievements

- Solved **830+ algorithmic problems** across LeetCode, CodeChef and Codeforces with **425+ active practice days**.
- Completed hands-on labs through **Google Cloud Skills Arcade**, gaining exposure to GCP services and cloud workflows.
- Active GitHub contributor with **190+ commits**, **25 pull requests**, and **240+ contributions**.
